

MA511: Computer Programming

LAB 2 Assignment (Due: 01th Aug 2025)

To execute these labs, you will only use the tools/techniques we have discussed in class.

Graded assignment

You need to upload the code and the output screengrab of the following assignments.

1. Write a program that takes as user input lowercase character and prints the corresponding uppercase.
2. Write a program that takes as user input a 3-digit number and reverses the number.
3. Take as input a dividend and two divisors as input from the user. If the dividend is a multiple of both the divisors, print 1, otherwise print 0.

For example, if dividend = 64, divisor1= 4, and divisor2=8 then output =1

4. Write a program that takes as input two integers and returns 1 if they are equal, 0 otherwise.
